

**Shukai Duan** received Ph.D. degree in Computer Science from Chongqing University, China. Prof. Duan has been with the College of Electronic and Information Engineering, Southwest University since 1996, serving as associate professor (2005-2009), and professor (2010-present). He is currently Vice Dean of Department of Science and Technology, Deputy Director Intelligent Transmission and Control Technology National Engineering Laboratory, Southwest University.

He also serves as an associate editor of Neurocomputing, IEEE member and an IEEE CIS member. He did postdoctoral research on Control theory and engineering in Chongqing University from 2007 to 2009. He was invited to do research as a visiting professor at Department of Electrical Engineering and Computer Science in University of Michigan, University of Windsor, Texas A&M University at Qatar, City University of Hong Kong, in 2010, 2013, 2014 and 2016, respectively.

His research interests include memristor and memristive system, chaos and nonlinear circuits, artificial neural networks, neuromorphic system, Nano-electronic devices and information processing. He is Principal Investigator for more than 20 research projects, including three National Natural Science Foundation of China (NSFC) and New Century Excellent Talents from Ministry of Education Program. He has published more than 130 papers in Nature Communications, IEEE Trans. on TNNLS, IEEE Trans. on CAS, SMC, Electronics Letters, Nonlinear Dynamics, and international conferences.
